

SecureLAN

Protecting your network from security threats, while maintaining accessibility and convenience for both internal, remote and mobile staff can be complex and expensive. Seccom Global offers SecureLAN – a low cost, powerful, all in one security solution that replaces or integrates with your existing systems.

SecureLAN protects your business assets!

Threats that propagate throughout the Internet can change rapidly. They look for new system vulnerabilities to target, which can potentially lead to the destruction of your data and systems. SecureLAN uses industry leading technologies that automatically provide virus updates to each firewall. SecureLAN also uses an arsenal of Integrated Application Security Engines, which quickly identify and block today's blended attacks from infecting the network.

SecureLAN offers:

- ✓ Stateful Inspection Firewalls
- ✓ Intrusion prevention systems
- ✓ Content Filtering Applications
- ✓ Spam and Virus Email Protection
- ✓ Adware and Spyware Protection software
- ✓ Corporate Gateway Antivirus
- ✓ Instant messaging control
- ✓ VPN support
- ✓ 24x7 technical support and monitoring
- ✓ Granular reporting
- ✓ Remote SSL VPN
- ✓ Traffic & Protocol Management
- ✓ Bandwidth compression

FULLY MANAGED

As one of Australia's largest Managed Security Service Providers, Seccom Global are well equipped to provide a quality security solution, tailored to meet the demands of any sized business, from multi-national corporations to small and medium sized enterprises. Seccom Global is able to provide the expertise, infrastructure and systems to implement and manage your solution, allowing you to focus on your core business. Having a fully managed security solution reduces business risk and your overall IT expenses, while giving you cutting edge technology at your fingertips.

EXPERT ADVICE AND SUPPORT

Seccom boasts some of the most experienced security engineers in the country. As a specialist organisation, our security engineers are adept at integrating technologies and completing international infrastructure rollouts. Our team provides advice and support on vulnerability testing, solution design, security policies and control procedures. We deliver unsurpassed 24x7 technical support, ensuring that SecureLAN is a smart solution for businesses of all sizes.

REPORTING AND MONITORING

SecureLAN offers a full monitoring and reporting service, meeting the needs of any organisation. With large multi-nationals already using SecureLAN to protect their networks, Seccom Global has created reporting infrastructure which provides valuable information to an organisation's IT specialists and executives. The knowledge that your network is being monitored professionally gives you piece of mind.

SCALABLE

Seccom Global SecureLAN comes with upgrade protection, meaning that if your business grows and you need to upgrade your security appliance, you only pay a monthly fee instead of the entire cost of a new device. Ask us about our upgrade services.

LOW COST

SecureLAN reduces your IT security costs significantly. You have the choice of several options, including a monthly plan, which requires little or no capital investment. Find out how inexpensive managed security can be and enjoy SSL and VPN support at no extra cost!
