

SecureWAN

Wouldn't it be great if your ISP actually worked with you to protect your network from Internet based threats? At Seccom Global, we don't believe that an ISP should send you Viruses, Trojans and Spam, while billing you for the traffic or bandwidth they consume.

With SecureWAN, your traffic is filtered for 100% of known viruses, Trojans and Malware, delivering you true clean bandwidth. Seccom Global's SecureWAN uses specialised security devices, located within our POP's, to eliminate the threat before it has access to your network. SecureWAN has been designed and built on Tier 1 reliability, without the acquisition costs usually associated with this level of quality.

HIGH CONNECTIVITY SPEED

Seccom SecureWAN is available in speeds up to and over 1Gbps. Using the backbone of major wholesale suppliers, Seccom SecureWAN can be delivered across various fixed tall technologies including Leased Line, ATM, Ethernet, E1, Wireless and xDSL (inc. SHDSL, ADSL and ADSL2+). In addition, the traditional remote access solutions, including permanent and dial-on-demand ISDN and Dial-up are ready to complement daily operating requirements.

FULL FEATURED CONECTIVITY

SecureWAN offers a range of powerful options that Include inbound and outbound virus scanning, intrusion prevention, remote device (router) monitoring, including SNMP device statistics, trending, availability, outage response and escalation. It also offers comprehensive reporting options including Automated Virus Alerts, Telecommunication Bandwidth Utilization and availability reports. Combined with fully redundant, load -balanced Firewalls, SecureWAN is a premium product available at a realistic price.

REDUNDANCY AND RELIABILITY

Losing an internet connection can be damaging. SecureWAN offers low cost redundancy through our multi-carrier relationships. SecureWAN features automatic failover to a different carrier, meaning you have near zero network outages. Using only best of breed telecommunication suppliers means you have excellent reliability backed by strong SLAs.

LIMITED OR NO SWITCHING COSTS

Seccom Global has relationships with many Tier 1 suppliers and, in most cases, can assist with some of the switching costs. You don't need to stay with an inferior Internet Connection - we can help migrate you to the powerful SecureWAN product before the end of your contract.

LOW COST

You will be surprised at how little it costs to get a secure internet connection. If performance, reliability and strong support at an affordable price are what you are looking for, why not contact us today?
