CONNECTING

Internet Connectivity and Private Networks - We provide cost-effective, highly secure, business-grade, filtered, unmetered internet and uncontended WAN connectivity with integrated enterprise level DDoS protection through our SecureWAN Solution. The solution delivers clean traffic with better than 99.999% uptime through our inbuilt redundancy of design and partnerships with leading tier 1 suppliers.

IP Telephony and Unified Communications - We deliver secure, enterprise-class IP telephony and Unified Communications services supported by specialist engineers.

Wireless Connectivity - Seccom Global is responsible for delivering and supporting some of the largest public WiFi networks in the southern hemisphere. We are able to implement a complete end-to-end wireless solution, from cabling and installing, through to configuring and supporting the network.

SECURING

As one of Australia's longest-standing and recognised **Managed Security Service Providers**, we understand the value of being able to reliably connect to, transfer, store and share information securely.

Our SecureLAN (Managed Firewall) and SecureSTREAM (website/eCommerce protection) solutions provide fully managed, trusted services for a diverse range of customer needs.

For peace of mind, our SecureINTEL (Security, Information and Event Management SIEM) solution will keep an eye on what is happening on your network and alert you to suspicious activity.

With thousands of security devices under management and a wealth of expertise gained from managing these services and solutions, Seccom Global is ideally placed to assist you with your IT security requirements.

We will protect your data with our SecureDR solution, with copies of your data both onsite and offsite. You will never lose more than 15 minutes of your work!
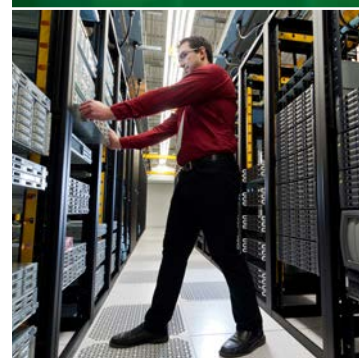

MANAGING

We take care of the work for you; delivering, monitoring, managing and supporting your services 24 x 7 through our dedicated **Security Operations Centre** with access to our highly-skilled and certified engineering team.

As security threats, network complexity and compliance requirements continually increase, many of our customers have found that the use of our **Managed Services** delivers the best result for them.

PARTNERING

We work hard on listening, working with and being flexible for our customers. We know that each customer's situation is unique and solutions need to be tailored to specifically meet their needs. As a result, we develop, deliver and/or manage **On Premise, Hybrid or fully Managed Cloud based solutions** that help you achieve your objectives.

We also work closely with a comprehensive range of class leading tier 1 suppliers to provide integrated solutions for our customers.

OUR **KEY PARTNERS** INCLUDE:

HP · DELL · CISCO · FORTINET FAST. SECURE. GLOBAL. · vmware · palo alto NETWORKS · Synology · XIRRUS WI-FI NETWORKS · 3CX · Barracuda · epygi · AAPT · Ruckus Simply Better Wireless. · Microsoft Partner · BigAir · Westcon Group · TELSTRA · VOCUS communications · vodafone · metronode · nextgen GROUP · LogRhythm The Security Intelligence Company · EXCLUSIVE NETWORKS · AVNET · DICKER DATA
